SUMMARY

CS + DS @Rutgers University with strong skills in **Python, Java, C++, SQL, and full-stack web development**. Built and deployed **FindJob4Me**, a production job-search platform featuring secure authentication, real-time data pipelines, and role-based admin tools. Experienced in **cloud platforms, APIs, agile workflows, and data analysis**, with proven success through hackathons, research, and leadership roles. Actively seeking a **Software Engineer (Full-Stack/Backend)** role to apply technical expertise and deliver scalable, data-driven solutions.

TECHNICAL SKILLS

Languages: Python, Java, C++, JavaScript, HTML5/CSS3, SQL | **Frameworks/Tools:** React, Node.js/Express, Git/GitHub, Agile/Scrum, MongoDB, Pandas, NumPy, scikit-learn | **Cloud/Deployment:** AWS, Google Cloud Platform, Vercel, Cloudinary
Other: Algorithms & Data Structures, Database Systems, RESTful APIs, Machine Learning, Data Analysis, Data Visualization, Web Scraping

PROJECTS & HACKATHONS

- **FindJob4Me** — Personal Project — React, Node.js/Express, MongoDB, Cloudinary, Vercel, Google OAuth, APIFY | [Live Demo](#)
Built a dynamic job-finder that aggregates *live* openings (APIFY) with deep links to original posts; implemented email/password (securely **hashed**, never plaintext) + Google sign-in, profile photo & résumé/CV uploads (Cloudinary), Browse Jobs with search/sort, application tracking, contact form persisted in MongoDB, and a role-based **admin dashboard**.
- **Portfolio Website** — Personal Website — React, HTML, CSS, JavaScript, Vercel | [Live Website Demo](#)
Deployed a responsive portfolio showcasing projects (e.g., FindJob4Me, Railway Booking System) with clean navigation and project cards linking to live demos; tuned layout/UX, basic SEO and custom branding/animations created with design tools.
- **Railway Booking System** — **Rutgers University** — *Java, JSP/Servlets, MySQL, Tomcat* | [GitHub](#) · [Demo](#)
Built train booking web app with role-based auth (Admin/Rep/User), 7 servlets + 25+ JSPs, JDBC (Prepared Statement), and session management; deployed on Tomcat.
- **Vestibular System Stimulation Research** — **Princeton University** — *Python (NumPy, Pandas), Experimental Design, Statistical Analysis* | [Summary](#)
Analyzed effects of vestibular stimulation on auditory localization; designed experiment, cleaned/analyzed data, ran statistical tests; **no significant effect** found; presented results.
- **Crime Activity Report** — **Hack TCNJ** — *HTML5, CSS, JavaScript, MongoDB, Google Cloud* | [GitHub](#) · [Devpost](#)
Built interactive crime data visualization site (FBI 1960–2019); implemented state/year filters and trend views; deployed via GCP with MongoDB-backed datasets.
- **Government Port Parking Tool** — **HackNJIT** — *Python (Folium), HTML/CSS/JS* | [GitHub](#)
Created interactive map + reservation tool for port parking; used Folium for geospatial visualization and simple storage for reservation records.

EXPERIENCE

Amazon Fulfillment Center – Warehouse Associate | Monroe, NJ | Oct 2024 – Present

- Optimized package routing via inventory software.
- Collaborated to enhance safety protocols and resolve scanning issues.

Robert Wood Johnson Hospital – Dietary Assistant | Somerville, NJ | Apr 2023 – Sept 2024

- Digitized dietary tracking to improve patient care.
- Reduced food waste using supply chain forecasting.

EDUCATION

Rutgers University – B.S. in Computer Science, Minor in Data Science | GPA: 3.7 | Sep 2024 – Present | Dean's List (2x)

Princeton University – Transfer Scholars Initiative | GPA: 3.7 | Jul 2024 – Aug 2024 | Neural networks, AI-brain links, Python programming

Middlesex College – A.S. in Computer Science | GPA: 3.96 | Sep 2023 – May 2024 | Dean's List (2x), 1st place coding challenge (2x)

LEADERSHIP & VOLUNTEERING

President & Vice President – Computer Science Club (Middlesex College); **Volunteer Lead** – Mayank Foundation;

Management Team – National Service Scheme
