EDUCATION

Rutgers University

Sep 2024 – May 2026

B.S. Computer Science, Minor in Data Science | Magna Cum Laude | Dean's List (2×)

GPA: 3.8

Coursework: Deep Learning, Machine Learning, Data Structures & Algorithms, Computer Security

Middlesex College

Jan 2023 – May 2024

A.S. Computer Science | Dean's List (2×) | Coding Competition Winner | President, CS Club

GPA: 4.0

TECHNICAL SKILLS

Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend / Mobile: React, TypeScript, JavaScript, React Native (exposure)

Backend & Systems: Java (MVC, JSP/Servlets), Node.js/Express, REST APIs, ETL/ELT pipelines

Databases: MySQL, MongoDB, Microsoft SQL Server, JDBC

AI/ML & Cloud: PyTorch, CNN, OpenCV, Generative AI/LLMs | AWS, GCP, Oracle Cloud, Azure

Tools: Git, GitHub Actions, CI/CD, Agile/Scrum

EXPERIENCE

Oasis Infobyte

Oct 2025 – Nov 2025

Data & Application Developer Intern (Remote)

- Built a full-stack Java application with MySQL backend using MVC architecture; translated business requirements into scalable technical solutions through structured problem-solving.
- Designed and optimized SQL data pipelines using JDBC Prepared Statements — improved query performance ~30% and reduced runtime errors by 25%; participated in Agile code reviews and debugging.
- Communicated complex technical decisions clearly to non-technical stakeholders; demonstrated high work ethic and attention to engineering fundamentals throughout delivery.

Princeton University

Jul 2024 – Aug 2024

Research Assistant — Computational Data Analysis (Princeton, NJ | On-site)

- Selected as one of ~30 students for Princeton's competitive Transfer Scholars Initiative; conducted research on vestibular system stimulation under faculty supervision.
- Processed and analyzed complex, multidimensional EKG sensor data using statistical methods to identify physiological patterns.
- Leveraged Python for advanced data cleaning and visualization, translating raw time-series datasets into a structured technical presentation for university researchers.

Middlesex College CS Club

Sep 2023 – May 2024

Peer Tutor, CS & Data Structures (Edison, NJ)

- Mentored 26 students in algorithms, data structures, and programming; led club as President — strong verbal/written communication and leadership in a collaborative, high-integrity environment.

PROJECTS

AI Code Reviewer | *Python, FastAPI, React, TypeScript, PostgreSQL, Groq API, GitHub Webhooks*

- Built end-to-end AI pipeline that auto-reviews GitHub PRs using Llama 3.3 70B (Groq API) — detects bugs, security vulnerabilities, and performance issues; posts structured feedback as PR comments within <5 seconds.
- Engineered GitHub webhook pipeline with HMAC-SHA256 signature verification; achieved 98.4% delivery reliability and 96% OAuth auth success rate with ~80% reduction in manual review time.
- Deployed full-stack app (React/TypeScript + FastAPI) on Vercel + Render with PostgreSQL on Neon cloud; reduced API latency by 37% via query optimization and real-time dashboard polling.

FindJob4Me | *Python, React, TypeScript, Node.js/Express, MongoDB, REST APIs*

- Architected REST APIs, data schemas, and server-side pipelines using React (TypeScript) + Node.js; achieved 96% auth success rate and 98.4% upload reliability.
- Reduced P95 latency by 37% via query optimization across MongoDB collections handling multi-user concurrent sessions.

Cat Pose Estimation & Behavioral Classification | *Python, PyTorch, CNN, OpenCV*

- Engineering a two-stream CNN pipeline (DeepLabCut + optical flow) to classify animal behaviors from video; applies PyTorch model training, evaluation, and iterative improvement at scale.

CERTIFICATIONS

Oracle Cloud Infrastructure 2025: Generative AI Professional | AI Foundations Associate | Data Science Professional | AI Vector Search | AWS Solutions Architecture 2025 | GitHub Foundations 2024 | Harvard CS50 2021
